

Health and Safety Checklist

Dear Trainee,

Congratulations on selecting a Qualified Driver Trainer which means that you receive the best and most professional support. We place immense value in the trust the community gives us to deliver safe, professional training, and take this responsibility seriously.

Our Driver Trainers are committed to ensuring that you will be safe during your lesson.

Before your lesson, your Driver Trainer will have thoroughly washed their hands, and they will have used a disinfectant product to clean the interior of the vehicle.

We also care for the health and safety of our Driver Trainers. I ask that you acknowledge this checklist before commencing the lesson. Your complete honesty is important as we protect our community.

Question 1

Do you have any flu-like symptoms such as fever, aching limbs or respiratory symptoms such as a cough, shortness of breath, runny nose or sneezing?

If yes, you will be unable to take your training lesson today. We recommend you see a health professional.

Question 2

Have you come in close contact with anyone who has flu-like symptoms such as fever, aching limbs or respiratory symptoms such as a cough, shortness of breath, runny nose or sneezing?

If yes, you will be unable to take your training lesson today. We recommend you follow professional advice about self-quarantining for such period recommended by the Department of Health.

Question 3

Do you have any Medical Conditions that may affect your ability to drive? Such as Diabetes or Epilepsy. If you have a M (Medical Condition) on your licence, you need to have a current Medical Certificate with you.

We ask that you always practice good hygiene to protect against infection. Good hygiene includes:

- Washing your hands often with soap and water - this is better than hand sanitiser.
- Using a tissue and covering your mouth when you cough or sneeze.
- Avoiding close contact with others such as shaking hands.

Thank you for taking this issue seriously.
